Your contact at ARKH Advisory: **Alexander Arkhipenko, PhD** — Owner & Director. ARKH Advisory, Saint-Germain-en-Laye, France · serving clients across the US & EU.

THE GAP WE CLOSE

## Senior medical expertise, exactly when your program needs it

Establishing a credible medical function in neuroscience is demanding: the science moves quickly, and advisory boards and publications require experience that early-stage teams rarely hold in-house, and cannot yet justify hiring full-time. ARKH Advisory closes that gap with a senior partner who has led this work inside industry, engaged on a fractional, project, or retained basis, and focused specifically on neurology and neuro-diagnostics.

WHY ARKH ADVISORY

### Specialist, not generalist

A dedicated focus on neurodegeneration, Alzheimer's, Parkinson's, MS, rare neurological disorders, and diagnostic biomarkers. Engagements begin productive, with no ramp-up.

### US & EU reach

Direct experience and established thought-leader relationships across both markets - one partner for transatlantic strategy.

### Senior, on demand

Director-level Medical Affairs without the headcount, overhead, or hiring lead time. Scale up or down by stage.

HOW WE WORK TOGETHER

## Three ways to engage

Choose the model that fits your stage. Fixed scope, senior delivery, remote-first.

**RETAINER**

### Fractional Medical Director

Your part-time senior medical lead - ongoing strategy, KOL engagement, advisory boards, publications, on-call judgement. Capped days/month, fixed monthly fee.

**FIXED FEE**

### Project packages

- Medical Affairs strategy & 12-month roadmap
- KOL mapping & engagement plan (US or EU)
- Advisory board - design to insights report
- Publications & abstract development
- Medical review of materials (MLR / MRC)
- Protocol & clinical development plan review

**DAY RATE**

### Advisory & overflow

Senior input by the day - expert interviews, advisory-board facilitation, congress coverage, and overflow for in-house teams and agencies.

FOR PHARMA & ESTABLISHED TEAMS

## Specialist and overflow capacity for in-house Medical Affairs

Already have a Medical Affairs function? Bring in senior neuroscience expertise for a defined need - neutral, fast, and confidential. Engaged by project or day rate, with no headcount impact and global time-zone flexibility.

### Advisory board facilitation

Independent design and expert, neutral facilitation of neurology advisory boards, with a synthesized insights report your team can act on.

### Publication support

Senior medical writing for manuscripts, reviews, consensus statements, and congress abstracts - to submission-ready, ICMJE-aligned.

### KOL mapping

Curated, tiered KOL maps and engagement plans across US and EU neurology and neuro-diagnostics.

### Overflow capacity

Senior MSL / Medical Advisor bandwidth by the day - to cover peaks, congresses, vacancies, or specialist topics.

## Where ARKH Advisory goes deep

If your asset sits in neurology or neuro-diagnostics, this is the consultancy built for it.

Alzheimer's disease

Parkinson's & parkinsonian syndromes

Dementia with Lewy bodies

Multiple sclerosis

Rare neurological disorders

Prion diseases

Amyloid & tau PET

DAT-SPECT imaging

Drug development

Diagnostic & disease-monitoring biomarkers

EVIDENCE, NOT ADJECTIVES

## A track record you can verify

6

Peer-reviewed publications, incl.  
Alzheimer's & Dementia (2025)

50+

KOL relationships across US &  
EU

8+

Advisory boards run end-to-end

200+

Peer-to-peer presentations

Experience spanning **GE HealthCare**, **MedDay Pharmaceuticals**, **myTomorrows** and **Syneos Health**.

### Selected publications

Leuzy A, ..., **Arkhipenko A**, ... Farrar G. Considerations in the clinical use of amyloid PET and CSF biomarkers for Alzheimer's disease. *Alzheimer's & Dementia*. 2025;21(3):e14528.

Kuo PH, ..., **Arkhipenko A**, Fisher JM. Optimal DaTQUANT thresholds... *Tomography*. 2024;10(10):1608-1621.

O'Shea DM, **Arkhipenko A**, ..., Galvin JE. Practical use of DAT SPECT imaging in diagnosing dementia with Lewy bodies. *Front Neurol*. 2024;15:1395413.

ABOUT

## Alexander Arkhipenko, PhD

A Medical Affairs leader with a PhD in life and health sciences and 9+ years in pharma and biotech, focused on neurodegeneration and diagnostic biomarkers. Built KOL networks across the US and EU, designed and ran advisory boards end-to-end, supported a diagnostic imaging label update, delivered hundreds of scientific presentations, and published with leading experts in journals including *Alzheimer's & Dementia*. ARKH Advisory brings that senior, specialist experience to the companies that need it most: biotech and diagnostics teams who need the medical thinking before they can build the department.

HOW ENGAGEMENTS RUN

### 1 · Fit call

30 minutes to confirm scope, fit, and the right model. No pitch.

### 2 · One-page proposal

Clear scope, deliverables, timeline, fixed fee. You approve before work starts.

### 3 · Senior delivery

Remote-first, async-first, meeting-light, on time.

## Let's talk about your neuro program

A 30-minute fit call, no pitch - just whether ARKH Advisory can help, and how.
